INFORMATION SECURITY/CYBERSECURITY PROFESSIONAL

Accomplished professional with extensive experience in providing strategic direction to cybersecurity and information assurance operations across the military/defense sector. Proven record of applying advanced intelligence skills to identify, assess and mitigate threats and vulnerabilities. Recognized for superior technical acumen, as well as project management strengths that align with organizational goals and requirements. Versatile leader committed to organization success through collaboration and teamwork, as well as driving performance improvements through coaching, mentoring and developing top-level workforces.

Core Competencies

Cybersecurity & Information Assurance • Vulnerability Analysis • Crisis Management • Risk Identification & Mitigation
Cyber Investigations • Systems Engineering & Enhancement • Strategic Planning • Program & Project Management
Policy Creation • Conflict Resolution • Regulatory Compliance • Process Improvement • Teambuilding, Coaching & Mentoring
Security Requirements Definition • Organizational Leadership • Cybersecurity System Integration • Data/Operational Integrity

PROFESSIONAL EXPERIENCE

ABC AGENCY

Air Force Base, New York, NY 10001

09/2019 TO PRESENT

40 hours/week; \$00,000/year

CYBERSECURITY PROJECT LEAD

CYBERSECURITY LEADERSHIP: Lead a team of 18 program managers through the planning and execution of extensive cybersecurity assessments to identify gaps and operational risks. Develop vulnerability remediation plans, including the implementation of hardware/software security solutions and short/long-term testing processes to mitigate potential risks. Conduct compliance reviews and remediation testing to define security requirements and introduce enhanced security solutions across key MDA systems.

- Designed, implemented and revised cost-effective solutions to support rapid reconfigurability and development across MDA operational and development environments.
- Partnered with program managers to introduce improved security standards and solutions consisting of hardware, software, PPSM and STIG/SRG.
- Held Interim Top Secret Security Clearance.

CYBERSECURITY TECHNOLOGY PROJECT LEADERSHIP: Manage a team of 4 cybersecurity engineers on the planning, implementation and enhancement of security solutions across MDA environments. Hold full accountability for process improvements and project completion, ensuring attainment of established goals within approved timeframes.

- Drove the integration of cybersecurity solutions and requirements within MDA systems across all operations groups, working closely with project resources and on-site leadership.
- Coordinated service delivery model, leading engineers through all project activities to ensure customer requirements and expectations were met.
- Assessed new cybersecurity architecture and engineering requirements to identify operational and administrative changes to support the continuous improvement of cybersecurity across the MDA.
